NOTES FOR THE GUIDANCE OF SEARCHERS IN THE MAIN INDEX.

1. **Alphabetical order** is determined by treating each heading (excluding subheads) as a whole, whether composed of one word or several words. Thus **" Aliens "** would come between **" Ali Bin Raschid "** and **" Ali Fahmy."**

Subheads do not affect the order of the main heading, from which they are separated by a colon; *e.g.*, **" Bavaria: Royal Family "** would come before **" Bavarian League."**

Conjunctions and prepositions occurring in a heading are, for alphabetical purposes, treated in the same way as any other words.

2. **Initials** are treated as subheads except in the case of vessels bearing the name of a person, when the whole name is indexed as it stands. For example, **" T. R. Horton," S.S.** comes between **Treaties** and **Trials.**

3. It is sometimes impossible to subdivide a large heading into a single series of subheads. In such cases a distinction is made between the standard subheads (which are indicated by a colon) and the words or phrases (placed in brackets) used for the purpose of grouping associated entries of a different type. In the case of **" Armenia,"** for example, groups of entries might be arranged under **"Armenia (Armenian attacks on Moslems)" " Armenia (Status and Mandate)",** etc., before the standard subheads " Administration," " Chamber," etc., begin.

4. Where the names of two countries occur in a heading, the first in alphabetical order is placed first; *e.g.*, Japanese trade with Argentina would be found under **" Trade and Commerce: Argentina and Japan."**

5. **Oriental names** are usually indexed as they stand, unless the first word is obviously a title, when it is placed at the end. This does not apply to Japanese names, which are indexed under the last name.

6. The heading **" Loans "** is subdivided according to the country **raising** the loan, *e.g.*, a loan from the Netherlands to Austria would be indexed under **" Loans: Austria," not " Loans: Netherlands."**

7. Correspondence with, or concerning, individual banks is assembled under the heading **" Banks."** In addition, the heading **" Banks and Banking "** is used for general banking matters.

8. Matters connected with British institutions, administration, etc., are indexed under **" Great Britain "** in the same manner as in the case of foreign countries.

9. It is important that searches should not be confined to the most likely subhead. The point at issue may have been originally overshadowed by other questions associated with it, and consequently indexed under some other subhead, or under the main heading alone. To save space, entries are not usually duplicated under different subdivisions of one heading.

It should also be remembered that a few papers, which have not passed through the Registry, are kept in the various Departments, and that no record of them appears in this Index.

10. In the case of a short correspondence dealing with a single subject, only the first paper is, as a rule, indexed.

Closely connected entries are indented after the first entry.

11. The figures preceded by a letter are the numbers of individual papers: these are followed successively by the file-number and the index-number, the last indicating the country and archives-division.

Examples of numbering :—

(1) A613/A9214/613/45/N428/17/38 would stand for papers 613 and 9214 of the American series, kept in file 613 of subdivision 45 (*i.e.*, United States), and paper 428 of the Northern series, kept in file 17 of subdivision 38 (*i.e.*, Russia).

(2) When the index number of a file is omitted it is understood to be the same as that of the following file, thus C412/C817/39/C843/16/18 would stand for papers 412 and 817 of the Central series, kept in file 39, and 843 also of the Central series, kept in file 16, both of subdivision 18 (*i.e.*, Germany).
